## RELEVANT COURSEWORK

Database Management | Business Intelligence | Business Analysis | Big Data Analytics | Data Structures | Information Systems Design & Development | Information Architecture | Machine Learning | Artificial Intelligence | Cloud Computing | Customer Relationship Management | Location Analytics and Web GIS | Business Data Communications | Signals & Systems | Computer Networks | Software Engineering | Operating Systems | Information Systems Project and Change Management

## TECHNICAL SKILLS

**Programming Languages:** Python, SQL, R, CSS, C++, JavaScript, HTML

**Data Visualization Tools:** SQL, Tableau, Power BI, Google Analytics, Google Data Studio, ggplot2, ArcGIS, MS Excel, Google Charts, Azure, AWS

**Data Analysis:** Predictive Analysis, Statistical Analysis, Data Mining, Data Modeling, Factor Analysis, Time series Analysis, Cluster Analysis, Root Cause Analysis, Competitive analysis, ROI Analysis, Network Analysis

**Data Science Libraries** Tensor Flow, scikit-learn, Keras, PyTorch, Pandas, NumPy, Matplotlib, seaborn

## CERTIFICATES

Google Data Analytics (Coursera, 2023) | Python for Data Science (Coursera, 2023) | R for Data Science: Analysis and Visualization (LinkedIn) | Career Essentials in Business Analysis (Microsoft and LinkedIn, 2024) | Preparing for Data Analysis (LinkedIn) | Agile Methodologies (University of Maryland, 2023) | Google User Experience (Coursera, 2023) | Google Ads (Google, 2024) | Microsoft Project (LinkedIn)

## ACADEMIC / PERSONAL PROJECTS

**Netflix Data Analytics** May 2024 – Jul 2024

- Executed SQL queries to extract and transform a Netflix dataset of 1 million+ records, achieving 98% data accuracy.
- Conducted EDA on viewing behavior and demographics, identifying trends that increased user engagement by 15%.
- Created 10+ Tableau visualizations, boosting data-driven decision-making and improving content strategy effectiveness by 20%.

**Market Trends Analysis** Jan 2024 - Feb 2024

- Utilized SQL to clean and analyze 100,000+ records from shopping datasets, ensuring data accuracy, and identified top 10 spenders contributing to 30% of revenue while analyzing product popularity.
- Segmented customers by spending habits, enabling targeted marketing strategies that increased engagement by 25%.
- Provided insights that drove strategic decisions, resulting in a 15% sales increase in the next quarter.

## PROFESSIONAL EXPERIENCE

**Pace University** New York, NY  
Graduate Student Intern Jan 2024– Jun 2024

- Led data analysis initiatives with faculty using Excel and SQL, improving student performance metrics by 25% and driving targeted interventions.
- Managed over 100 inquiries and greeted 50+ visitors monthly as the primary contact, maintaining 200+ client records and supporting document processing for a team of 10.

**USA Trading LLC** New York, NY  
FBA Analyst Sep 2023– Jun 2024

- Assisted in managing Amazon FBA operations by conducting product research, optimizing listings for improved visibility, and coordinating inventory to ensure product availability and minimize costs.
- Analyzed sales performance and advertising metrics, providing insights that informed data-driven decision-making and enhanced customer satisfaction through effective issue resolution.

**Brainy Beams Pvt. Ltd.** Gujarat, India  
Data Analyst Jan 2023 – Sep 2023

- Executed complex SQL queries and collaborated with analysts to develop data-driven processes using Tableau and Excel, boosting productivity by 40% and reducing labor costs by 30%.
- Partnered with HR to create a linear regression model in Excel that accurately predicted new hire salaries, improving budgeting by 20% and enhancing financial planning.
