Results-driven Data and Business Analyst with 2.5+ years of experience in translating complex data into actionable insights. Proficient in Python (pandas, statsmodels), SQL, R, Tableau, Power BI, and Google Analytics, leveraging predictive modeling, statistical analysis, and KPI-driven reporting to optimize business strategies. Skilled in root cause analysis, A/B testing, and market trend forecasting, with a track record of enhancing product performance, sales funnels, and stakeholder decision-making.

SKILLS

- Programming and Query Languages:** Python, SQL, R, DAX
- Data Visualization and Reporting Tools:** Tableau, Power BI, Excel, Google Analytics, PowerPoint
- Product and Business Analysis Tools:** Jira, Confluence, Notion, Miro, CRM Systems, Lucidchart
- Statistical and Analytical Techniques:** Hypothesis Testing, Regression Analysis, Time-Series Forecasting, Cohort Analysis, RFM Segmentation, Root Cause Analysis
- Data Analysis Competencies:** Exploratory Data Analysis, Behavioral Segmentation, KPI Design, Market Trend Analysis, Opportunity Assessment, Funnel Analysis
- Strategic and Process Tools:** Agile Methodologies, Project Management, A/B Testing Frameworks, Competitive Benchmarking

PROFESSIONAL EXPERIENCE

Business Analyst Intern June 2024 – Dec 2024

USA Trading LLC, Jersey City, NJ

- Evaluated product performance across Amazon, Walmart, and eBay using Looker dashboards and sales data to find underperforming SKUs and optimize pricing.
- Defined success metrics (sell-through rate, ROI, BSR rank) to align with sales goals and support inventory planning for restocking and bundling existing products.
- Collaborated with support and operations teams to analyze returns, complaints, and delays, tracking issues in Jira and Notion to reduce repeat fulfillment problems.
- Queried sales and customer trend data using SQL to support A/B testing of listing titles, bullet points, and image layouts for improving product conversion rates.
- Wrote product requirement notes and process steps in Confluence to support internal operations and reduce onboarding time for launching new ASIN listings.
- Engaged in supplier and stakeholder communications to include feedback in SKU selection, boosting product-market fit by tracking competitor and buyer behavior.
- Created Power BI dashboards showing opportunity analysis and performance reports, supporting decisions on restocking, pricing updates, and seasonal promotions.

Graduate Student Intern, University Counsel Jan 2024 – June 2024

Pace University, New York, NY

- Built statistical models using R and Python (pandas, NumPy, statsmodels) to extract trends from legal data, supporting risk analysis and operational improvements.
- Performed multivariate analysis and hypothesis testing to evaluate the effects of university policy changes, delivering actionable insights to compliance teams.
- Created Tableau and Power BI dashboards for legal risk metrics, enabling stakeholders to track trends, interact with data, and improve decision-making efficiency.
- Implemented ARIMA models for time-series forecasting on case response data, informing process optimization strategies across legal and administrative functions.
- Wrote SQL queries to analyze structured legal data, uncovering case trends and compliance gaps, and supported cross-functional teams with data-driven insights.

Data Analyst Jan 2023 – Dec 2023

Brainy Beams Pvt. Ltd. – Tech Education Company

- Designed SQL reports to extract insights from learning data, improving visibility into engagement trends across segments and informing product decision-making.
- Performed cohort retention analysis in Excel and Python, identifying early drop-off indicators and advising changes in course pacing for better user continuity.
- Built Power BI dashboards for marketing and sales KPIs, enabling department heads to track performance and make timely strategic decisions from real-time data.
- Utilized Google Analytics and UTM tracking to assess channel performance, reallocating marketing spend to higher-yield platforms based on behavioral insights.
- Implemented regression models in Python to evaluate ad spend against lead quality, guiding optimization of targeting strategies across paid marketing campaigns.
- Applied RFM segmentation in Tableau/Excel to tailor outbound marketing, increasing engagement across high-value customer segments based on spend behavior.
- Analyzed CRM funnel stages to locate lead leakage, working with sales to reframe touchpoints and strengthen opportunity progression through the pipeline.
- Created sales trend forecasts using seasonal decomposition techniques in Python (statsmodels), helping leadership align resource planning with high-activity cycles.
- Led weekly insight sessions with marketing and sales managers, translating raw data findings into strategy-aligned recommendations backed by statistical analysis.

PROJECTS

Heart Data Analysis

- Analyzed heart disease risk using Python, MySQL, Seaborn, and Matplotlib, driving insights from demographic and clinical variables through structured EDA.
- Revealed gender-based angina disparities and identified key cholesterol-blood pressure trends to support early diagnosis with targeted correlation analysis.

Netflix Data Analysis

- Queried and segmented 1M+ viewership records using SQL, revealing demographic usage patterns, engagement frequency, and regional content preferences.
- Designed an interactive Tableau dashboard aligning audience trends with content formats and time-based engagement peaks to inform strategic release decisions.

Market Trends Analysis

- Leveraged SQL and Excel to analyze shopping transactions, identifying revenue concentration by top consumer segments and surfacing category-level insights.
- Delivered structured analysis on temporal purchase behavior, enabling strategic adjustments in inventory allocation, pricing models, and marketing timelines.

EDUCATION

Pace University, Seidenberg School of Computer Science and Information Systems, Manhattan, NY Sep 2023 – May 2025

Master of Science (MS) in Information Systems | **Concentration:** Business Intelligence

- Relevant Coursework:** Business Analysis, Big Data Analytics, Machine Learning, Artificial Intelligence, CRM, Business Intelligence, Data Communications

Gujarat Technological University June 2019 – May 2023

Bachelor of Technology in Information and Communication Technology

CERTIFICATIONS

Agile Methodologies – UMD (2023) | Python for Data Science – Coursera (2023) | R for Data Science – LinkedIn (2024) | Business Analysis Essentials – Microsoft (2024) | Google Analytics – Google (2024) | Google Ads – Google (2024) | Data Analytics and Visualization Job Simulation – Accenture (2024) | Corporate Analyst Development Program Job Simulation – JPMC (2024)
